### OBJECTIVE

---

Full Stack Developer with 2.3 years of hands-on experience designing, developing, and deploying scalable web applications. Proficient in React, Node.js, Express.js, MongoDB, and RESTful API development. Skilled in building secure, high-performance solutions with clean UI design and robust backend logic. Adept at collaborating in cross-functional teams to deliver business-critical applications and continuously learning emerging technologies.

### EDUCATION

---

I graduated with a Bachelor of Technology in Information Technology from KHIT.

### EXPERIENCE

---

#### SP Software Pvt. Ltd., Hyderabad

**August 2023 – Present**

**Role:** Full Stack Developer

June 2025 - Present

- Engineered a scalable RESTful API using Node.js, Express.js, and MongoDB to manage core business logic, including product catalog management, secure user profiles, and order processing workflows.
- Secured the application with a robust authentication system using JWT and bcrypt, and developed a role-based Admin Dashboard (React/Redux) for real-time sales reporting and inventory management.
- Integrated the Razorpay payment gateway to enable secure and seamless financial transactions, managing order creation, status tracking, and confirmation through automated email notifications via Nodemailer.
- Developed a responsive, high-performance front end using React and Redux Toolkit for state management, implementing a modern and accessible UI with Tailwind CSS.

**Skills:** React, Redux Toolkit, Node.js, Express.js, MongoDB (Mongoose), JWT, Razorpay, Tailwind CSS, Swagger

**Role:** Front-End Developer

March – May 2025

- Collaborated with the client, Brane, to gather and analyze UI/UX requirements, translating them into dynamic, data-driven Oracle JET components.
- Developed and customized Oracle JET pages using built-in components, charts, and data visualizations to fulfill the client's reporting and dashboard requirements.
- Implemented interactive features with conditional rendering based on user roles and data inputs, enhancing user experience and overall application performance.
- Integrated RESTful APIs for real-time data binding and created JET ViewModels to efficiently manage component logic and data interactions.
- Ensured a seamless user experience by focusing on responsive design, cross-browser compatibility, and adherence to Oracle Alta UI design principles.

**Skills:** OracleJet, TypeScript, Visual Studio Code (VS Code), Git, WebPack, Babel

**Role:** Full Stack Developer

May 2024 – February 2025

- Built a Jira-like Project Management System (PMS) to streamline task management and team workflows.
- Developed interactive task boards and dashboards using React.js for an intuitive and dynamic user interface.
- Implemented backend RESTful APIs with Node.js for task management and user authentication.
- Utilized MongoDB for data storage and optimized queries to ensure fast and reliable performance.
- Integrated real-time updates using WebSockets to enhance collaboration and task visibility.
- Designed key features including task creation, assignment, status tracking, drag-and-drop management, and advanced filtering.
- Ensured a responsive and accessible design using Bootstrap and custom CSS.
- Worked in an Agile environment, performing thorough unit and component testing with Jest and React Testing Library.

**Skills:** React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, JavaScript, Bootstrap, Visual Studio Code (VS Code), Postman, Git.

**Role:** Front-End Developer & UI Designer

February – April 2024

- Designed and developed the Jai Max website focused on cryptocurrency (Bitcoin) information and user engagement.
- Created a modern, responsive user interface using HTML5, CSS3, and Bootstrap, ensuring optimal performance across all devices.
- Implemented interactive sections, smooth navigation, and visually appealing elements to enhance usability and user experience.
- Integrated cryptocurrency data by fetching real-time information from APIs, displaying live Bitcoin prices and related details dynamically.
- Used React.js (basic) to build reusable components and handle simple state-based UI updates.
- Collaborated on color schemes, layout design, and branding to maintain a consistent visual identity.

**Skills:** React.js (Basic), HTML5, CSS3, JavaScript, Bootstrap, API Integration, Visual Studio Code (VS Code), Git

**Role:** Front-End Developer

October – December 2023

- Led the frontend redesign of SP Software's corporate website, focusing on enhancing user experience, visual appeal, and mobile responsiveness.
- Developed modern, reusable React components based on design mockups, ensuring consistency with the company's branding and UI/UX standards.

- Implemented a responsive layout using CSS Flexbox, Grid, and Bootstrap to ensure seamless compatibility across devices and browsers.
- Optimized performance by reducing asset sizes, applying lazy loading for images, and leveraging browser caching techniques.
- Integrated interactive features such as dynamic forms, smooth scrolling, and navigation transitions, significantly improving user engagement.

**Skills:** React.js, HTML5, CSS3, JavaScript, Bootstrap, Visual Studio Code (VS Code), Git

## TECHNICAL SKILLS

---

- Web Technologies: HTML, CSS, Bootstrap, SCSS
- Programming Languages: JavaScript, TypeScript, Node.js
- Frameworks: Express.js
- Libraries: React.js
- State Management: Redux
- Databases: MongoDB, MySQL
- IDE: Visual Studio Code
- Version Control System: Git
- Build Tools: Webpack, Babel
- Package Manager: npm
- API Development: RESTful APIs

I hereby declare that the above written particulars are true to the best of my knowledge
